Web Technologies	:	HTML5, CSS3, Bootstrap, RESTful, SASS, webpack.
IDE Tools	:	VS Code, IntelliJ, Web Strom, Subversive SVN, Sublime Text, Git.
Applications	:	Adobe Photoshop, Adobe (AEM), Figma, InVision

PROFESSIONAL EXPERIENCE

Quotient, Mountain view, CA
Role: Sr. Front End Developer

Oct'20–Till Date

Responsibilities:

- Integrated real-time financial data feeds and **APIs** into front-end applications to provide up-to-date market information and portfolio tracking.
- Collaborated with designers to create visually appealing and user-friendly interfaces for FinTech applications and platforms.
- Developed interactive user interfaces using **React.js**, implementing Higher Order Components (**HOCs**) for encapsulating cross-cutting concerns like authentication and data fetching.
- Built interactive financial calculators, budgeting tools, and investment analysis tools to empower users in making informed financial decisions using **React** with Redux.

- Utilized **React Router** to create dynamic routing, enhancing user experience by enabling seamless navigation in single-page applications (**SPAs**).
- Converted **Figma** designs to applications and always in collab with design team to provide any feedback on changes required.
- Used react hooks to improve code reusability, readability, and ease of integration testing.
- Created custom **hooks** to implement additional functionality to access local storage and call APIs.
- Worked on implementing various JavaScript Single Page Applications (**SPA**) using React and Node JS from scratch to production.
- Styled pages using **SCSS** and added responsiveness and cross behavior to front end applications using **mobile first approach**.
- Consumed Rest APIs to display and presentation data on applications for internal and end users.
- Reviewed, analyzed, and modified code during testing and debugging, and in response to issues.
- Worked on revamping entire .com pages to follow new guidelines.
- Optimized page load speed by 40% than it was before thus increasing google Page Speed score.

CrowdStrike, Sunnyvale, CA
Role: Front End Developer

Feb'18–Sept '20

Responsibilities:

- Developed components for **AEM** (CMS tool) to allow business to create content in websites that helps user to have a seamless experience on Intel .com pages.
- Worked with inbuilt CMS tool code editor (**CRXde**) to build replication version for the code.
- Enhanced and develop components inside **AEM** using Node JS, **JavaScript** and **SCSS**.
- Developed scripts in JavaScript, **CSS** and HTML and JQuery.
- Ensured content is cross-platform/browser compatible, and **responsive** to mobile devices.
- Ensured quality, accuracy and integrity of website content and consistency of brand presentation and aesthetics for all site content.

Apple Inc., Cupertino, CA
Role: UI Developer

June'16 –Jan '18

Description: I'm part of Apple Care project for which we developed webpages for different products at apple and localize them.

Responsibilities:

- Developed **JavaScript** code using framework of team's choice to satisfy the requirement of specific projects.
- Built **React** JS components to equip internal applications with reusable components.
- Used PostgreSQL to create database and store data fetched from **Node** JS application.
- Worked on HTML5 and CSS3 to work around the issues that were generated by CQ5 (CMS tool).
- Unit, Integration, System and User Acceptance Testing for customer facing application pages.
- Based on the UI prototypes, we build pages in the system called Adobe Experience Manager (**AEM**).

Hippo, CA
Role: Web UI Developer

Feb'16-May'16

Description: Hippo is combining cutting-edge tech and old-fashioned expertise to make shopping for auto insurance clear and simple
